

Attachment "B"

(Clean Copy of Amended Specification Paragraphs)

Please replace the specification paragraphs appearing at page 8, lines 7-21, with the following:

Q1 Since a pressure receiving portion and a holder are provided in a position receiving an impact load as a result of another car bumping into a rear of a subject car, and which corresponds to the position of the back of the passenger, and form a substantially U shape when viewed from a front, there are no projections; and consequently, to reduce cost, an operating plate or the like for receiving pressure is unnecessary.

Since a pressure receiving portion and holder are provided in a position receiving an impact load as the result of another car bumping into the rear of the subject car, and which corresponds to the position of the back of the passenger, and form a substantially L shape when viewed from the front, there are no projections; and consequently, to reduce cost, an operating plate or the like for receiving pressure is unnecessary. Since there is only one holder, weight can be reduced significantly.

Please insert the following paragraph at page 16, following
line 24:

Q2

Active headrest return spring 12 is locked by the lock portion
40B formed on the cover 39B.
